

Poly Vapour Barriers

The most cost effective way to provide a complete vapour and insect barrier around wall and ceiling mounted electrical boxes. Reducing air infiltration is the easiest way to reduce both heating and cooling costs and uncomfortable drafts. Until now, sealing around electrical boxes presented many problems - the old solutions were costly, time consuming and ineffective. Available now in ceiling, double, triple and quadruple box configurations, to fit both metal and plastic outlet boxes.

- W1 Single gang barrier
- W2 Two gang barrier
- W3 Three gang barrier
- W4 Four gang barrier
- C1 Octagon/Ceiling box barrier.
