

SpeedyTie™

An entirely new design in cable management, the SpeedyTie is a fully re-usable, easily releasable lashing tie. The SpeedyTie’s unique design allows it to be released with one hand.

Product Features

- Just one click to tie and untie
- Fully re-usable
- Once applied, the tail can be neatly tucked away for added safety
- Highly visible yellow color — also available in black, UV stabilized material (*contact HellermannTyton for more information*)
- Versatile design allows use for multiple applications
- 200 lb. tensile strength
- Made from durable nylon 6/6

OEM Packs

- Plain bag (no hang hole)
- Standard box
- 300 SpeedyTies - 12 bags of 25 SpeedyTies

SpeedyTie™ Applications

The SpeedyTie is a versatile tool for countless applications:

- Electrical Contractors
- Heating & Ventilation Contractors
- Residential Construction
- General and Heavy Industry
- Packaging
- Tubing and Pipe Bundling
- An "extra hand" for overhead installations

Temporarily bundling of unfinished parts or cables in an assembly line or a construction project.

Secures two bundles simultaneously. This can be accomplished by first inserting the tail through the open slot forming the first loop, then inserted the tail through the slot with the red lever, forming the second loop.

SpeedyTies are available in a UV stabilized black material for cable management on movie/stage sets or other outdoor applications that do not require the highly visible yellow SpeedyTie.

Temporarily attach extension cords or other cable to fencing.

Suspended piping - SpeedyTie is ideal as a temporary support aid during the installation of gas, water, and air pipes.

Site storage - bundling copper or plastic tubing together at the job site. Excess tail can be tucked away neatly for added safety.
