Product Specification Sheet

PRODUCT
MODEL CODE

Verge P3000N

Narrow Frame MDE

1. PRODUCT SUMMARY

The Primex Verge P3000N WiFi transparent Media Distribution Enclosure for structured wiring brings reliability when managing today's inside cable system requirements. Its flexible design provides a convenient, lockable and centralized location for easy installation and distribution of multi-play services within residential and commercial premises.

The Narrow Frame model allows for shared side-by-side stud mounting and tight corner installation.

2. PRODUCT DIMENSIONS

Inside: H 30"/W 14"/D 3.5"
Outside: H 31.8"/W 15.9"/D 4.9"

3. FEATURES & BENEFITS

- Large internal cavity ideal for holding broadband hardware such as a modem, ONT, UPS and fiber accessories for the connected home.
- Engineered WiFi transparent ABS plastic for up to 15x increased wireless signal pass through.
- Narrow bezel and staggered mounting tabs for shared side-by-side stud mounting and corner installation.
- Compatible with the Patented Primex Mounting System for quick and easy installation of equipment.
- Standardized mounting hole pattern fits wide range of modules and accessories.
- Lightweight for easy transport and installation.
- Twelve microduct-friendly 1" entry/exit ports and two gang box knockouts allow extensive cable routing.
- Optional dual locks for restricted access.
- UL Listed and North American made for reliability.

*Note: Enclosures are not fire-rated
