

## UNIVERSAL MOUNTING CLAMP

### ID-UMC-1

Designed to be used with the ID-IWB-1 enclosure, the ID-UMC-1 Universal Mounting Clamp is the ultimate tool for mounting your Audio/Video equipment. With snap-in-place technology, you can easily position the clamp exactly where you need it, then easily relocate it if necessary. Place your equipment within its jaws, and with a few turns of the knob the soft foam will securely hold almost anything. Don't worry about your job looking unfinished with excess screws sticking out, the mounting post has breakaway points every 1/2"

- Easy push snaps securely hold the clamp onto the breadboard of the ID-IWB-1 enclosure. The clamp is easily repositioned by simply unsnapping the clamp, moving it to the new position, and re-snapping into place.
- Breakaway mounting post allows for a clean finish.
- Knurled knob is designed to be easily turned, even in tight places.
- Top and bottom clamp have enough surface area to securely hold anything that fits in the box.
- Soft foam protects the equipment, while adding gripping force.
- Black Zinc finish assures that the finish will look new for years to come.
- A single clamp can hold most small pieces such as baluns, while two are recommended for larger items such as processors.

Part Number	ID-UMC-1	
Dimensions:	Minimum	2.15"w x 2.18"d x 1.36"h (To Knob)
	Overall	2.15"w x 2.18"d x 3.00"h (Top of Post)
