

ALR ELECTRIC SERIES

Motorized Electric Projection Screen

MODEL MT

What is the ALR Electric Series?

The ALR Electric Series is a collection of versatile motorized electric projection screens offering Ambient Light Rejecting (ALR) material. They are an ideal choice for home theaters, venues and other settings where a high-performance, retractable projection screen is needed and lighting is not well controlled.

Features

- Stylish, white all-aluminum case.
- Multiple control methods.
- Wall or ceiling mounted.
- ALR material blocks ambient light and boosts contrast

Exceptional Contrast

The ALR Electric Series comes with Severtson ALR material, which rejects ambient light and boosts contrast in situations where lighting is not well controlled. This unique 7-layer material is specially engineered to block incoming light improving the overall viewing experience.

Viewers will be drawn in by the clarity, sharpness, and excellent contrast of the projected image.

Experience ALR Electric

ALR Electric Series projection screens are designed for versatile applications - four control methods (manual button, IR remote, RS-232, and 12v trigger) come built-in to every screen, so you can control the screen without limitations or having to purchase additional components.

The ALR Electric Series is beautifully designed from its core. The custom high-powered, low-noise motor is built for reliable, long-lasting performance. The case is crafted from high-grade aluminum and powder-coated white for a light, aesthetically-pleasing appearance.

Material Choices

The ALR Electric Series comes with Severtson's unique 0.8 gain Ambient Light Rejection (ALR) material, a unique 7-layer projection surface designed to block ambient light while providing excellent contrast from the projector.
