

Dymension CI™ DW-MAX SUR In-Wall Bipolar Surround Speaker

Premium in-wall bipolar surround speaker
for high-performance home theaters

Bipolar Array

An angled bipolar driver array directs more energy in more directions, producing a larger-than-life soundfield in a flush, low-profile in-wall speaker.

Dual BDSS Woofers

Light, rigid, mineral-filled, 5.25" woofers feature Definitive Technology's Balanced Double Surround System (BDSS™), which improves excursion and delivers clear, natural music and dialogue reproduction.

Linear Response Waveguide™

Our patented waveguide extends both on-axis and off-axis frequency dispersion for more natural midrange and precise imaging and an open, airy sound.

Unobtrusive Big-System Sound

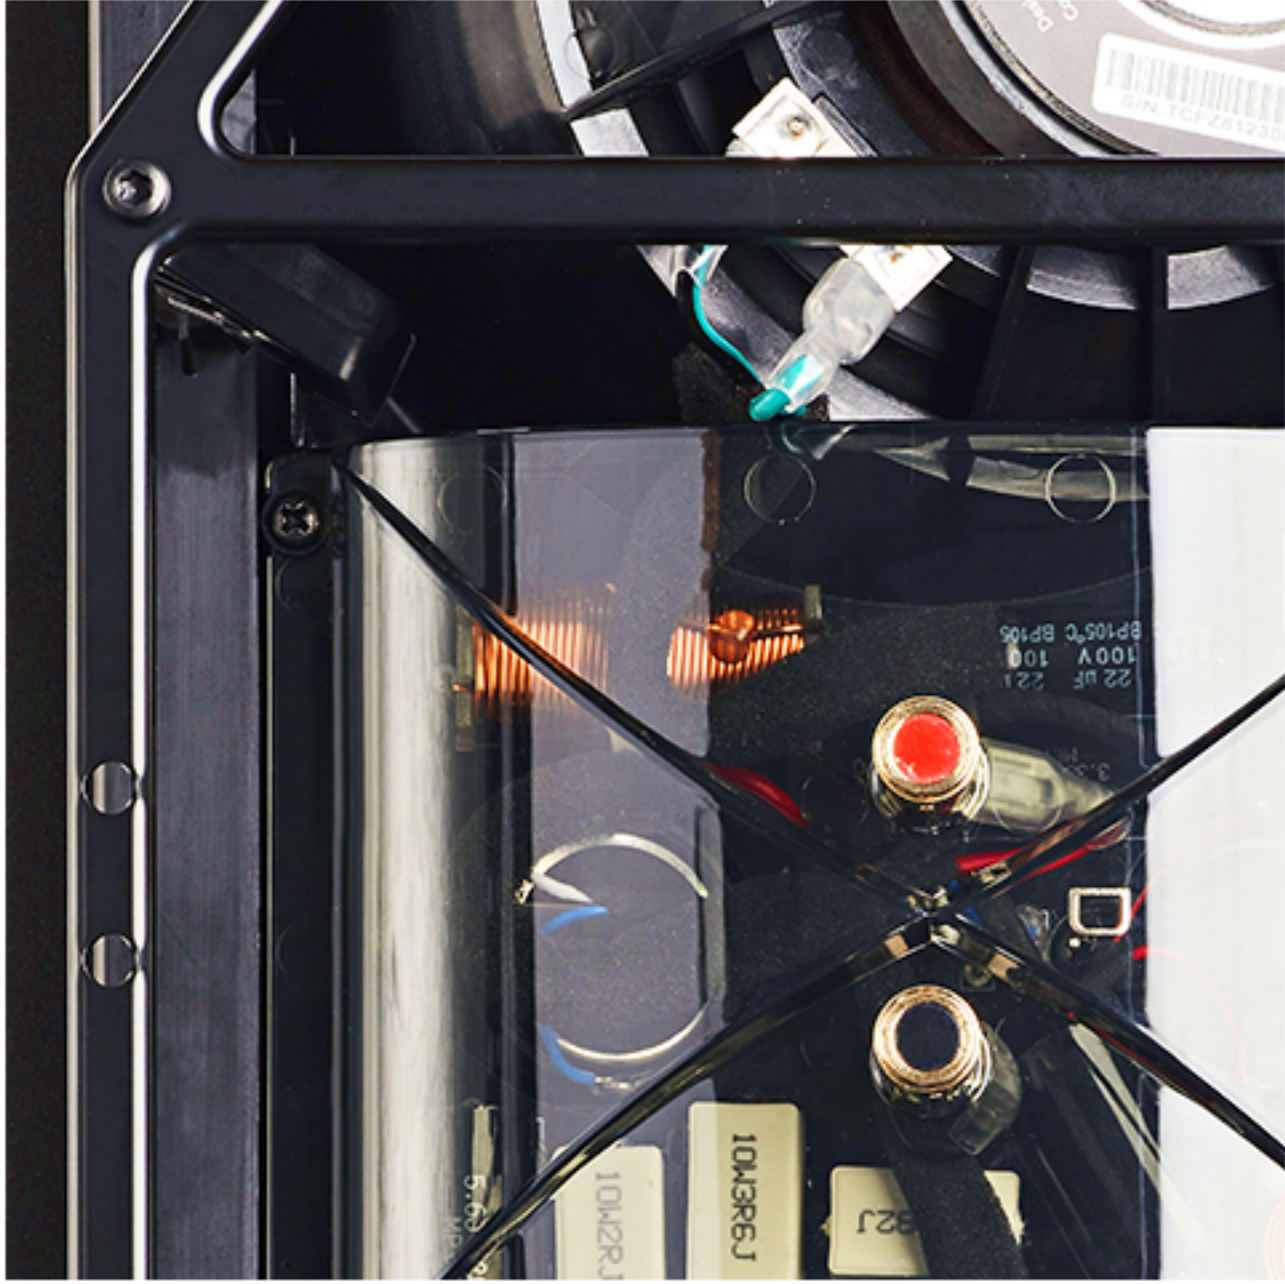

Aluminum Oxide Dome Tweeters

Dual 1" aluminum oxide dome tweeters present crisp, clear highs with superb imaging.

Tweeter Attenuation Switch

A three-way high-frequency adjustment switch (-2 dB, flat, +2 dB) lets you fine-tune high-frequency response to compensate for overly bright- or dull- sounding rooms.

Sophisticated Crossover

A premium crossover network ensures optimal driver performance for balanced voicing and smooth.
