

Advanced Information

HTF7003 Front Speaker

HTF7003 Front Speaker – rear view

Introducing the NEW KEF HTF7003 Home Theatre Soundbar

Designed to complement today's stylish flat panel televisions 32in. and larger, the HTF7003 soundbar may look diminutive, but the sound it produces is anything but. Listening to a movie on the HTF7003 is to be fully immersed in the soundtrack. The sound is so clear, detailed, and dynamic, you will feel everything the actors are experiencing on screen, be it the full range of emotions in your favorite drama, or all the action packed excitement of the latest blockbuster.

Reproducing the front soundstage with awesome realism, the HTF7003 soundbar's stylish enclosure looks perfect under your flat screen. Each of the three

channels contains dual 50mm (2in.) woofers and a 19mm (0.75in.) HF driver. For your convenience it comes supplied with a wall mount bracket and table stand. Because the front three channels are so perfectly matched, as the action on screen pans from side to side, the sonic image you hear will track the visual image perfectly. This will further enhance the realism of your cinematic experience.

Whether the system is wall mounted or sitting on a cabinet, when you press play, the KEF HTF7003 soundbar will fill your whole room with the soundtrack and you will be transported into the action.

Key Features

- Front three channels from a single loudspeaker
- Perfectly matched Left, Centre, and Right channels.
- Designed to match with 32in. and larger screens
- Can be wall or table mounted
