

REFERENCE CINEMA

The **Reference Cinema** in-wall speaker system is the ultimate home theater solution featuring a compact high-output design delivering reference level surround sound dynamics to medium and large size rooms. The proprietary high transfer crossover optimizes three premium drive units featuring a single 4x4 compression horn flanked by dual 8" carbon wool composite bass midrange drivers. Simply put, the **Reference Cinema** produces a uniform sound intensity with superior intelligibility, silky smooth multi-axis response, and a wide (60-degree) listening window from the seated position. With a reference sensitivity of 96 dB, the easy-to-drive reactive impedance optimizes its use with mid to high-end receivers and/or amplifiers. As with all of our in-wall speakers, every speaker is fully back boxed with choice of standard and custom grille fabrics.

FEATURES INCLUDE:

- Dual 8" Carbon Wool Drivers
- 4" x 4" horn tweeter
- MDF back box
- Ultra-wide dispersion
- High-output
- Multi-axis response
- Max SPL 118 dB @ 2M

SPECS DESCRIPTION		SPECS
System Design	Sealed In-wall	
Woofer	(2) 8" Carbon Wool	
Tweeter	(1) 4" x 4" Horn	
Recommended Amp Power	70-500 W	
Frequency Response	50 Hz – 20 kHz	
Impedance	4 ohms	
Sensitivity (db 1 watt/1 meter)	96	
Dimensions	12" w x 24.5" h x 5.75" d
