E-Z Bore®

Evacuates wood chips
faster for cleaner holes

High Quality Alloy
Steel for long life

149H-2-9/16

Cut it up... Move it out! It's E-Z!

Greenlee is proud to announce its new and improved E-Z Bore® bits, designed so that it's faster, safer and easier than ever to drill a hole. The new geometry of the spurs enables the bit to penetrate the wood smoother. This is due to the increased pocket depth and increased height of the spurs relative to the cutting edge. These new features allow the E-Z Bore® bit to drill cleaner holes and evacuate chips faster; in addition it does not splinter the wood.

These bits are made of high quality alloy steel, making them tougher and more durable than ever before. And, the shank of the bit now has a quick change hex for easier chucking and better grip.

The improved E-Z Bore® bits are yet another way Greenlee is listening to our customers and providing a product to help you do your job – on a daily basis.
