

Only one outdoor display
is good enough for the best.

peerless-AV®

Peerless-AV® displays are an amazingly affordable value—featuring top-of-the-line outdoor video quality along with the durability and longevity backed by a Two-Year Warranty.

Great viewing & good looks

- Full 1080p HD LCD
- Outstanding color depth and resolution
- Fast refresh rates
- Ambient light sensor—Easily viewable in daylight/twilight/dark
- Puts the emphasis on the picture, not the display
- Sleek, contemporary styling

Ease & flexibility

- Sizes range from 42" to 55" with Xtreme™ and 26" to 55" with UltraView™ models
- No special cables required
- VESA-compliant

Made to last

- Impact-resistant glass
- Corrosion-resistant
- Low-maintenance—no filters to change
- Made in the U.S.A.

Ventless Dynamic Thermal Transfer™ System

- Keeps internal components safely cooled and warmed without allowing in water, dust, vapor or insects
- Offers best-in-industry temperature operating range: -40°F / +140°F with Xtreme™ and -24°F / +124°F with UltraView™ models

UltraView™ TVs

Embrace the freedom of taking entertainment to new locations. Peerless-AV® UltraView™ TVs provide an elegant true outdoor TV solution. Instead of packaging TVs into expensive enclosures that still require openings to the outside environment, Peerless-AV® has created a new class of flat panel displays that creates a true outdoor TV. With a fully-sealed design, there are no vents, fans or filters to the outside that can expose the internal components to the elements, insects or even a spilled drink.

Xtreme™ Displays

There has never been an outdoor flat panel display like the Peerless-AV® Xtreme™ display. Eliminating the need for vents, filters or exhaust fans, the unique fully-sealed design provides the ultimate protection against weather, water and dust. A patented Dynamic Thermal Transfer™ system keeps internal components safely warmed in extreme cold and properly cooled in extreme heat. The unit is Compatible with all control systems via RS232 or IR. The Peerless-AV® outdoor flat panel display has the highest ratings for waterproof and dustproof in its class, making it the perfect choice for any location, indoor or out.

Xtreme™ Soundbar

The easy to install Xtreme™ Waterproof Soundbar is pre-wired and includes a 2-channel, 2-way, 50-watt maximum speaker system. The durable, tuned aluminum cabinet design delivers the most efficient sound output and is completely lined with rubber gaskets creating a perfectly sealed environment that resists the harshest weather conditions. Aluminum cone woofers and aluminum dome tweeters produce detailed, unclouded sound. Weatherproof and light weight the Xtreme™ Soundbar easily mounts to the Peerless-AV® Xtreme line of weatherproof displays.

Peerless-AV® Xtreme™ Daylight Readable Displays— Technology that outshines the sun.

Only Peerless-AV® daylight readable displays are enhanced to provide a deeper contrast. In turn, this creates a crisper picture that is more readable in direct sunlight than displays with only a higher brightness rating. A screen with only higher brightness tries to overpower ambient light but does not create better contrast. Peerless-AV® daylight readable technology makes it easier for the eye to see the picture even when the sun is at its brightest.

Made in USA

Peerless-AV® products are proudly manufactured in the USA. We establish the standards, we use the best materials and production processes, and we control our supply chain. With Peerless-AV, you know what you are getting and when you are getting it.
